chamois 403
chemical analysis of chrome 405
chemistry and technology of 141
chrome pigskin 325
color of in relation to fat quality 584
comfort properties of waterproof 459
comparison of from uncured and pit-cured hides 464
conditioner for 370
crust 326
damage from freeze branding of 188
damages caused by drycleaning 525

determination of aldehydes in oil-tanned 245
determination of fat content of 186
dressing of 368
drying of 275
dyeing of 526
dyeing of black 275
dyeing of for resistance to drycleaning and crocking 277
dyeing of garment 458
economics of 498
effect of drying on 145
effect of drying on pore structure of 276
effect of energy limitation on chemicals for 224
effect of liming on quality of 184
effect of N-containing compounds in on determination of Kjeldahl N 244
effect of on gold-plated materials 403
effect of processing on shape retention 278
effect of splitting and shaving on physical characteristics 56
effect of splitting on physical properties of 139
effect of steam on 581
effect of storage on properties of 269
elephant 274
errors in manufacture and use of 185
European market for 85
evaluation of water-resistance of 66
fastness to cracking of finish of 183
fatliquoring of 94
fatliquored with amphoteric betaines 380
finishes for 86
force-elongation properties and shape stability of 273
from sheep- and goatskins 141
from stomach 182
glace kid 54
history of industry of Bengal 83
hygienic properties of upper 276
improvement of heat shrinkage resistance of 366
improvement of pigskin velour 277
improvement of properties of by enzyme treatment 277
Japanese white 278
manufacture of in Europe 85
mechanical properties of 52, 53, 325, 580
modification and dyeing of by graft polymerization 146
modulus properties of 185, 186
moisture absorption of upper 245

nappa 581
oil-repellent suede 92
oils for the industry in India 83
paste drying of 182
pasting operation for 526
photographic imaging of 169
physical characteristics of 56
physical properties of glace kid 54
pigskin 141
polyurethane finish for 90
preparation of suede 88
pretannage of 89
processing of 145
production of laminate of 366
properties of chamois 245
properties of from sulfite-acetic acid preserved hides 226
properties of glutaraldehyde-retanned chrome 269
properties of side box 246
quality of chrome 405
quality of from sulfite-cured hides 372
rapid strength testing of 263
research in industry 461
retanning aniline 273
retanning of 94, 95
Rotan processing of 276
rotogravure printing on 149
sample size for investigating mechanical properties of 53
scanning electron microscopy of 114
shrinkage temperature of 139
shrunken 579
side upper 56
simultaneous retanning, dyeing, and fatliquoring of 227
sole from buffalo hides 83
specifications for French shoe industry 326
spray finishing of 162
standardization of 363
standard method for making 462
stuffing of 583
sweat resistance of 139
tanned with chrome and dialdehydes 139
tanning of with methylolmelamine 54
thermofixation of 582
uses for scrap from 525

variation in mechanical properties with location 525
waste proteins from 276
waterproofing of 87, 244
waterproofing of with titanium and silicon organic ethers 275
water-resistance of 367, 579
water-resistant 92, 368
water-resistant upper 66
water vapor permeability of 98
wet-dry differential of tensile strength of 225
with transfer finishes 403
urethane polymer finishes for 173
use of aromatic compounds in processing of 526
Leather board 275
Leather industry 363
Leather substitutes 365, 525
elastomeric 367
force-elongation properties and shape stability of 273
for shoe counters 89
for shoe uppers 85, 138
from polyurethane 91
permeable 364
photographic imaging of 169
preparation of 366
PVC-flow-molding product 85
water vapor permeability of 98
with needled textile fabric 91
LHEUDE, E. P., Biography 261
Lime speck 143
Liming, rapid 299
